

Darrell A. Poirier  
006-110-301

- 3 -

**REMARKS:**

The indicated paragraph has been amended to designate a specific relationship between this application and the parent application in order to comply completely with the formal requirements set out in 1268 OG 89 (18 March 2003) as the Commissioners interpretation of 35 USC 120 and 37 CFR 1.28(a)(2)(i) and for the magisterial convenience of the Office.

The designation of this application as a "continuation-in-part" of the parent should not be construed as a representation, implication, or even a suggestion that the present application necessarily contains matter that would be considered "new" by patent law criteria or matter that is unsupported by the disclosure (explicit or inherent) of the parent application.

Respectfully submitted,  
BLODGETT & BLODGETT, P.C.
